INTRODUCTION

MT5 is the successor to the MT4 trading platform, bringing even more features to traders. MT5 takes advantage of the 64bit architecture in modern systems making the platform much faster than the MT4. In addition, MT5 offers 8 more technical indicators, 13 more graphical objects, 12 additional timeframes and a built-in economic calendar.

With the OQtima MT5 platform, you can trade Contracts for difference (CFDs) on FX, Metals, Shares, Indices, ETFs and Energies.

INSTALLATION

Desktop

The installation of the OQtima Mt5 platform couldn't be easier with these simple steps:

1

Log into your Client Area and visit the "Downloads" section. Under MT5, choose your operating system and click the Download button.

2

Once the installation file has finished downloading, please navigate to the folder where you saved the file. This will usually be your downloads folder.

3

Double-click the installation file and follow the onscreen instructions to complete the installation

Once installed, the platform will launch automatically, and you will be asked to log.

If you have already verified your profile and created a live or demo Mt4 account, you will simply enter the login details you already received in your email.

If you have not yet opened a demo or live account, you can click [here](#).

Web Trader

You can use the **Web Trader** without any need to install the platform, and you can access it from any computer with an internet connection.

Once the **Web Trader** has launched, you can use your existing login details to log in to your Demo or Live account.

MT5 Mobile app

The **MT5 Mobile app** will allow you to trade on the go. Monitor your account and trades from anywhere in the world as long as you have an active internet connection.

To download the MT5 mobile app, visit the Google Play Store on your Android device and search for "MT5". You can also click on the download link in your Client Area by selecting the MT5 mobile version, or you can simply click on the following buttons:

MT5 Mobile and Tablet app

PLATFORM OVERVIEW

We have marked the important key areas for you to familiarise yourself with

1

Toolbar

You can customise and access quick shortcuts and tools.

2

Market Watch

This window contains all the available instruments for trading and where you can see the BID, ASK and Spread information.

3

Navigator

Here you can see all the trading accounts you logged in with and all your Expert Advisors and Indicators.

4

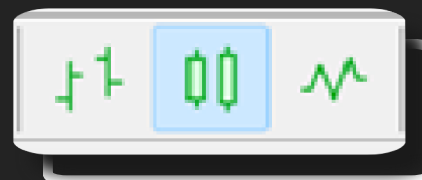

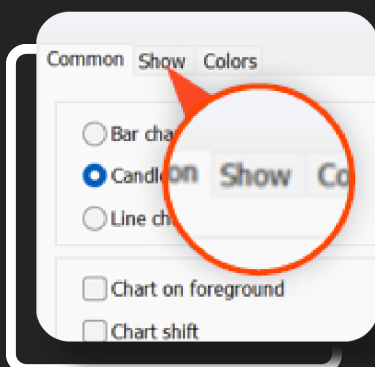

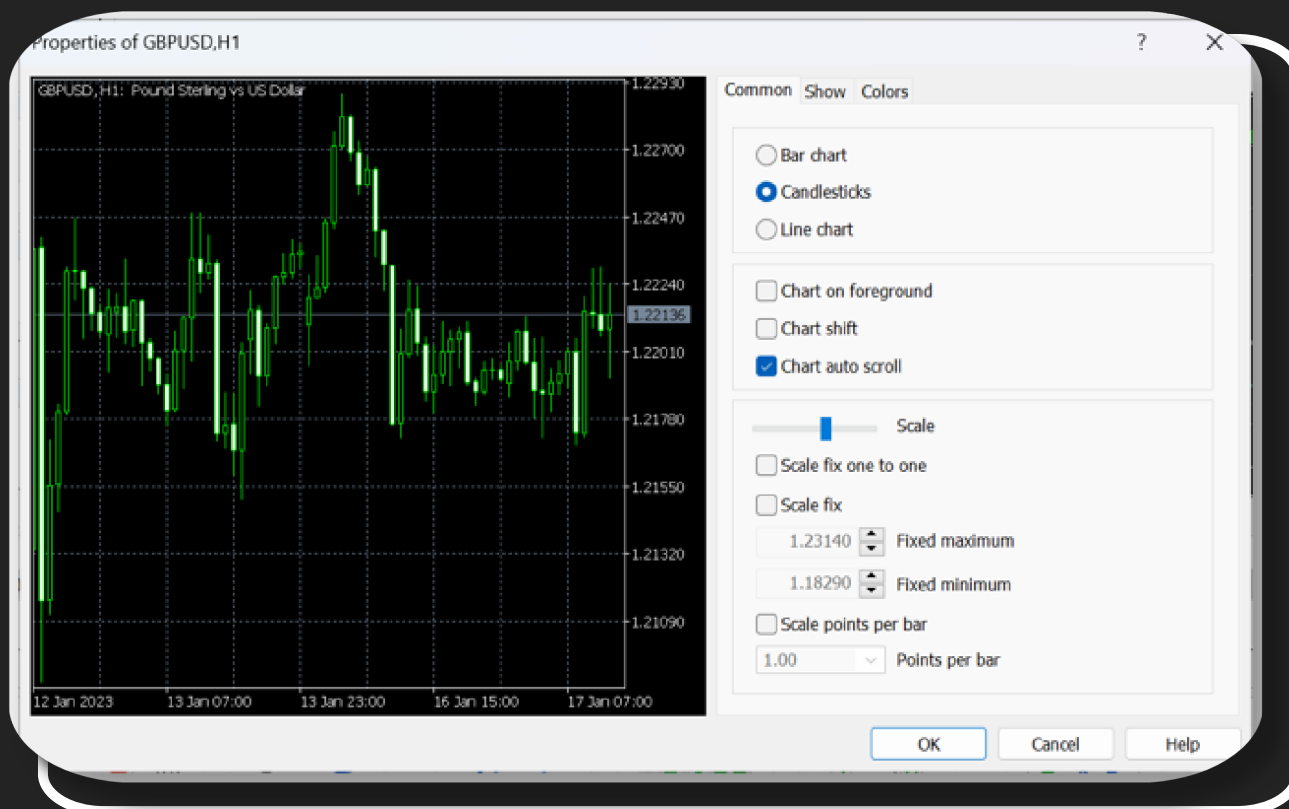

Terminal

Where you can see all your open trades, manage any existing positions, and access your trading history.

Charts and settings

Each chart can be completely customised to suit your preferences:

If you right-click on any opened chart and click on **"Properties"**, you can select your preferred color scheme or customise each element individually.

From the **"Show"** tab, you can adjust additional settings, such as enabling the ASK price to be visible or changing the chart type and by clicking the **"Colours"** tab, you can adjust the colours of your chart.

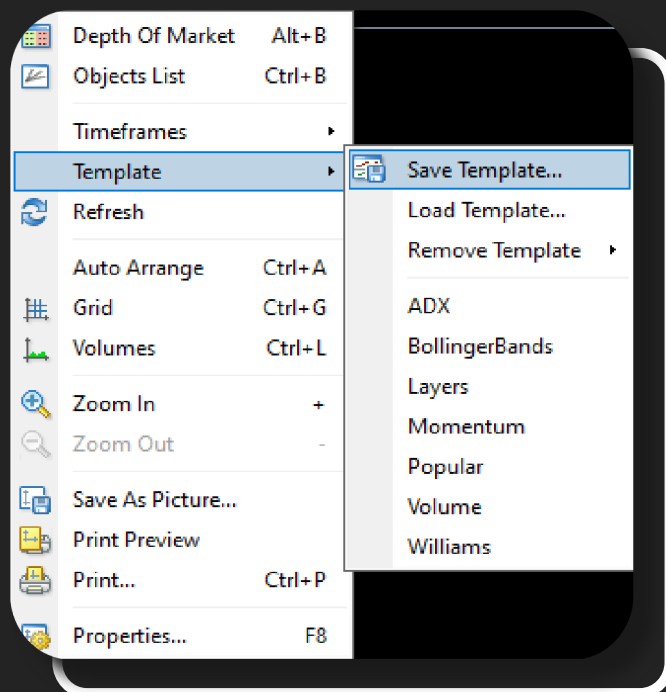

Switching between different chart types can also be done from the toolbar by clicking on the respective buttons.

Templates

Your chart settings can be saved as a template so you can easily apply it to any chart at anytime.

To save your settings, right-click on the chart you customised and select **Template > Save Template**. Give your template a name and click on **"Save"**.

To apply the template you just saved, open a new chart, right-click and select **"Template"** and click on the name you used to save your settings.

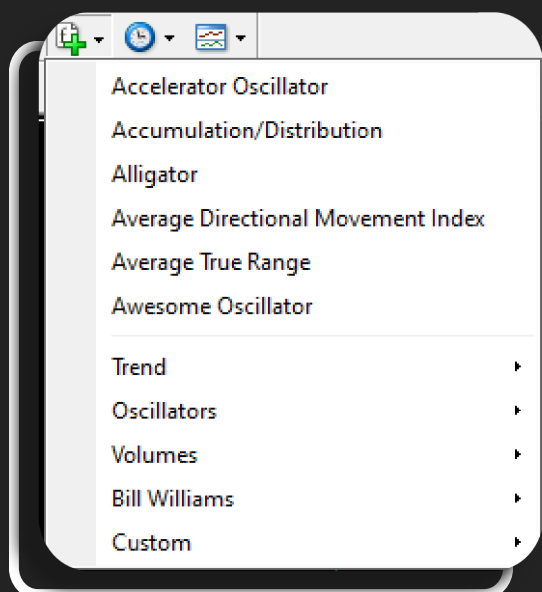

Indicators

You can choose from wide range of technical indicators for your charts that you can use in your trading strategy.

To add an indicator to your chart, click on the **"Indicators"** list in the toolbar or simply drag and drop it onto your chart from the Navigator window.

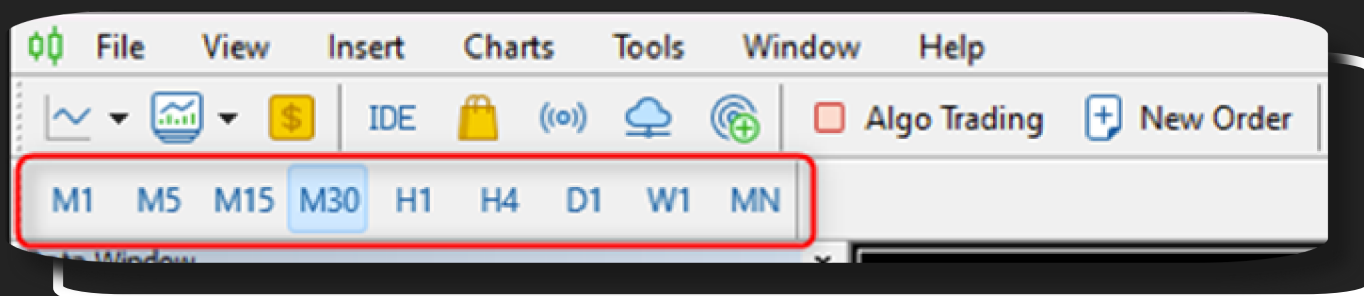

A new window will pop up once you have added the indicator to your chart and here you can adjust various settings. Some indicators will be added directly to your chart, while others will appear below.

To delete indicators from your chart, right-click on the chart and select **"Indicators list"**. In the new window that will appear, find the Indicator you wish to remove, click on it, and select delete.

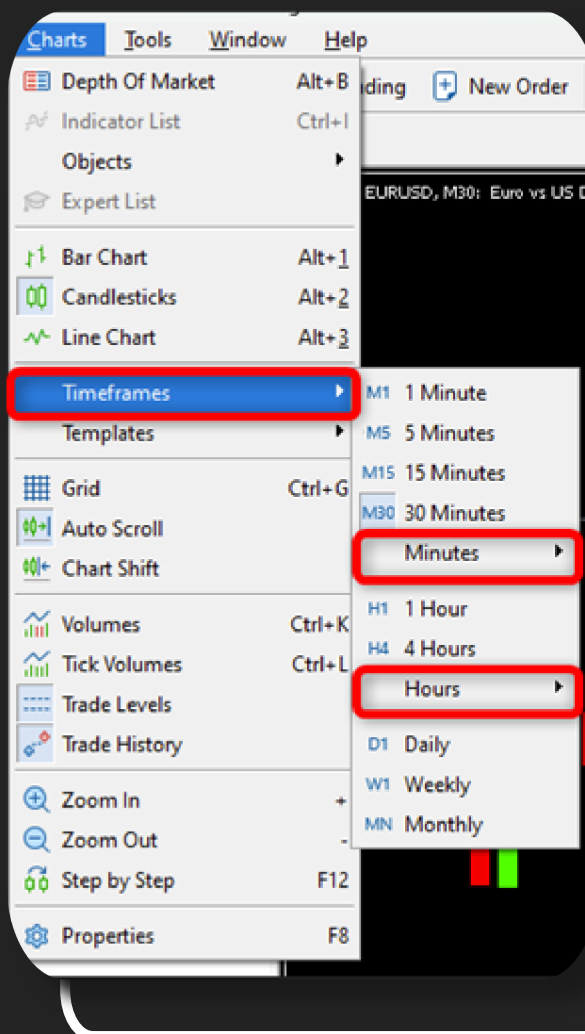

Time Frames

The MT5 offers a total of 21 different time frames you can choose from. You can choose directly from the toolbar between the 9 most used time frames

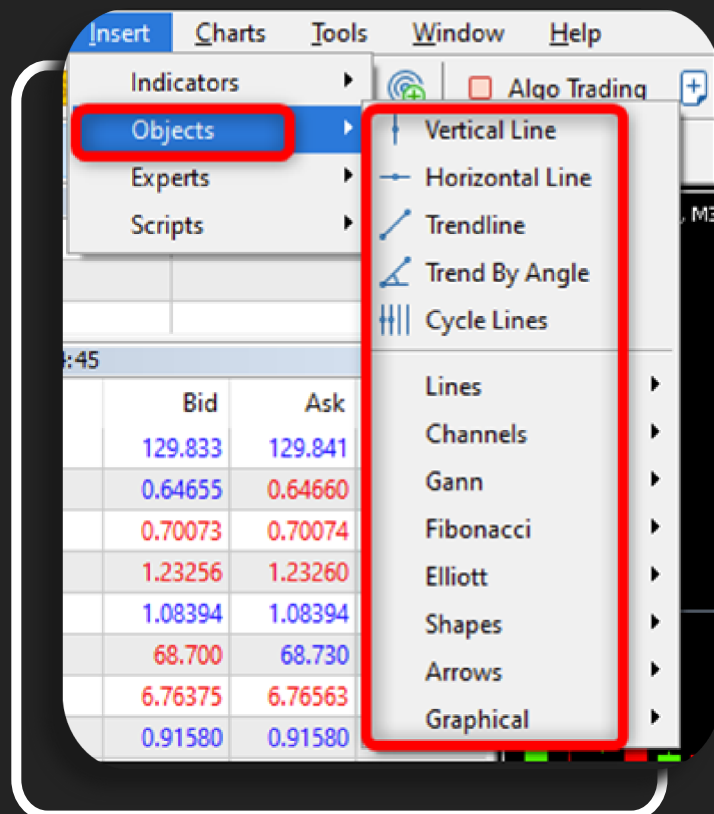

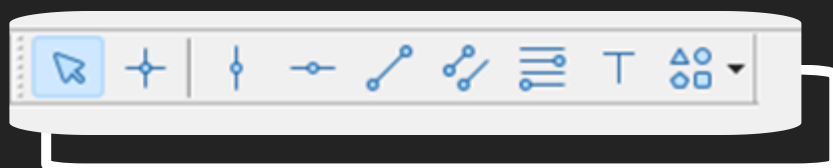

If you want to use additional time frames you can apply them from the "Charts" tab > selecting the "Timeframes" menu.

You will find additional timeframes under the "Minutes" and "Hours" submenu.

Drawing tools

MT5 provides traders with a wide range of drawing tools that you can use to help you analyse the market. These tools range from horizontal and vertical lines to draw support and resistance levels, price channels, and Fibonacci retracements

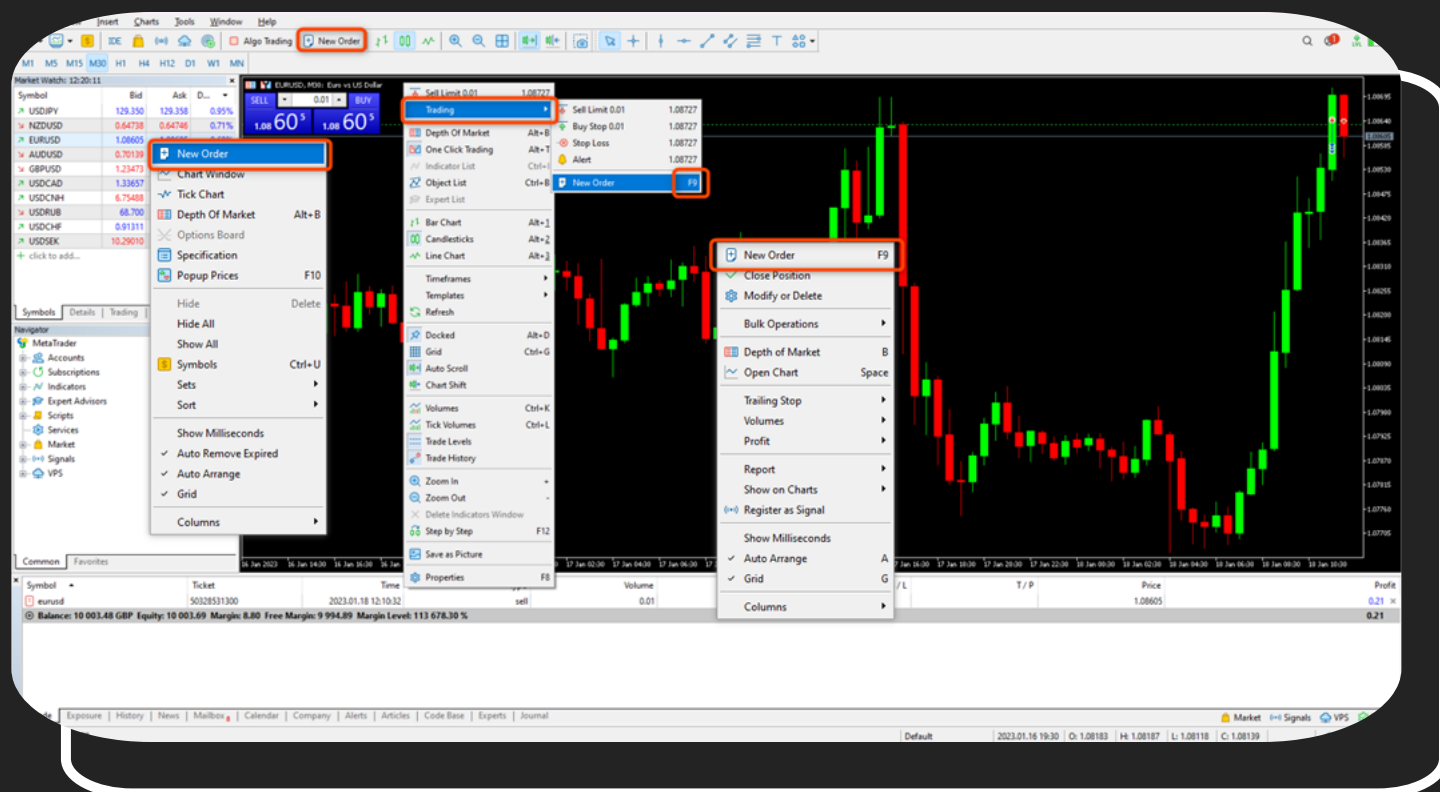

You can find more drawing tools from the **Insert > Objects** menu option.

TRADING

New Order

In the below screenshot, we have marked and listed all the places you can place a new order from

1

Toolbar | Select "New order"

2

Market Watch | Right-click on the instrument and select "New order"

3

Chart | Right-click on the chart, select "Trading" and then "New order"

4

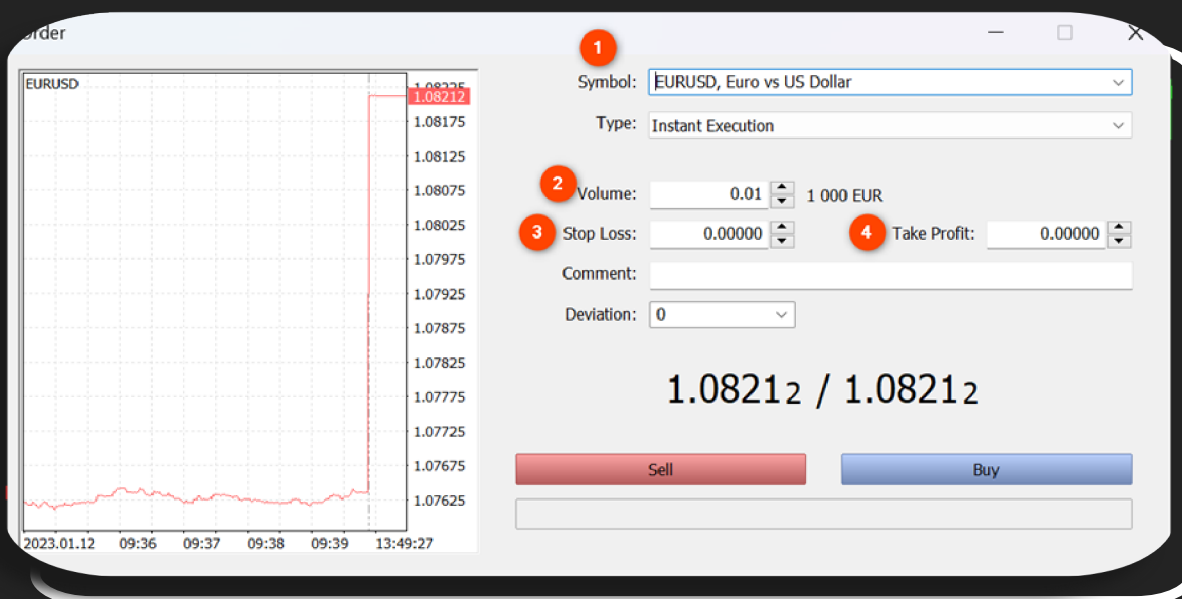

Terminal | Right-click inside the terminal window and select "New order"

5

F9 | Press "F9" on your keyboard

Market Order

For each Market order you will see the following specification options:

1

Symbol | Select the symbol you want to trade.

2

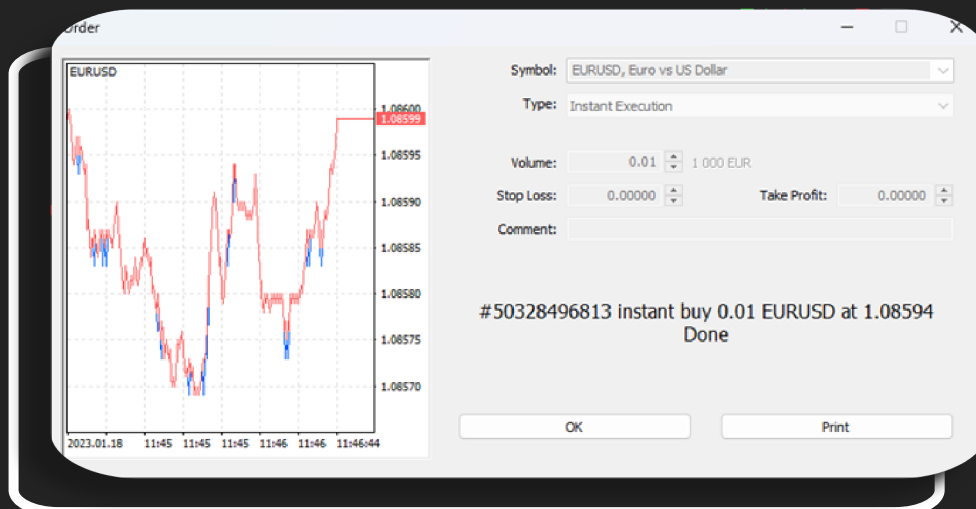

Volume | Select or enter the trading volume (FX 1.00 represents 1 Standard lot which is 100,000 units)

3

Stop Loss (SL) | Enter the market price you would like to set a stop loss (optional)

4

Take Profit (TP) | Enter the market price you would like to set a take profit (optional)

Then click on **BUY** or **SELL**, depending on the direction you want to trade.

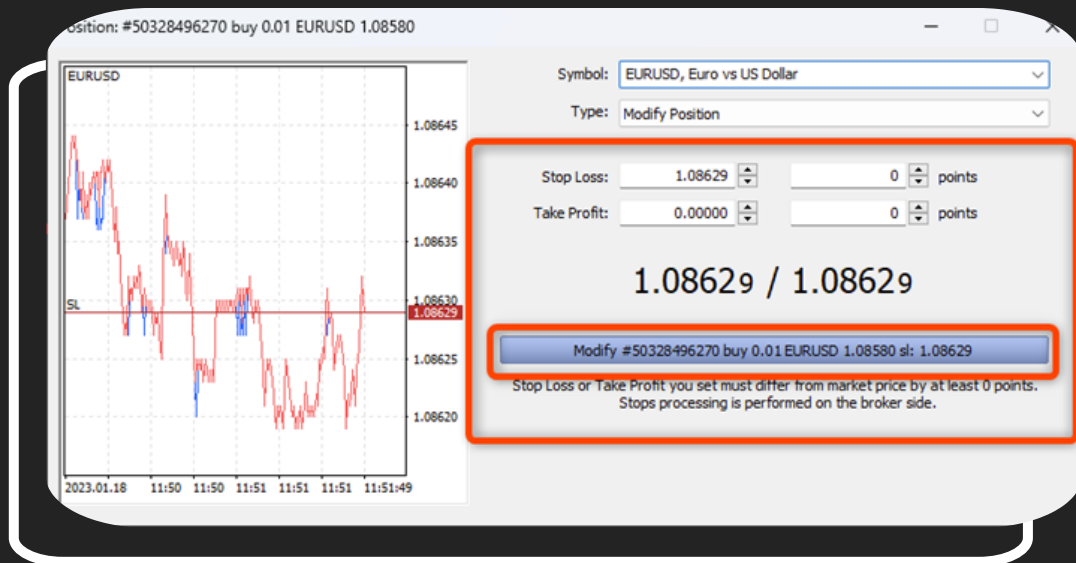

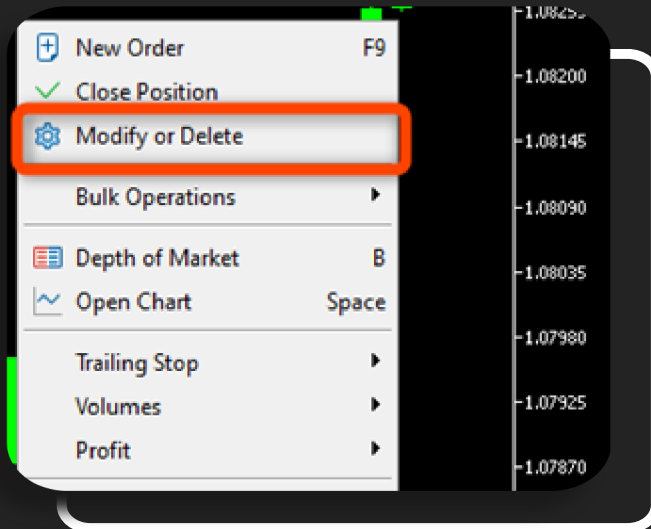

Once executed, a confirmation window will appear. Click **"OK"** to close the new order window.

Modifying an Open Trade

Your open trades can be monitored from the Terminal window by clicking on the "Trade" tab.

Symbol	Ticket	Time	Type	Volume	Price	S/L	T/P	Price	Profit
eurusd	50328496270	2023.01.18 11:46:22	buy	0.01	1.08580			1.08614	0.28
eurusd	50328496494	2023.01.18 11:46:27	buy	0.01	1.08587			1.08614	0.22
eurusd	50328496813	2023.01.18 11:46:42	buy	0.01	1.08594			1.08614	0.16
gbpusd	50328448919	2023.01.18 11:09:26	buy	0.01	1.23264			1.23398	1.09
Balance: 10 000.59 GBP Equity: 10 002.34 Margin: 36.40 Free Margin: 9 965.94 Margin Level: 27 478.96 %									1.75

To Modify an open position, you can right-click on the trade in your terminal window and select "**Modify or Delete Order**", or you can double-click on the trade in the terminal window.

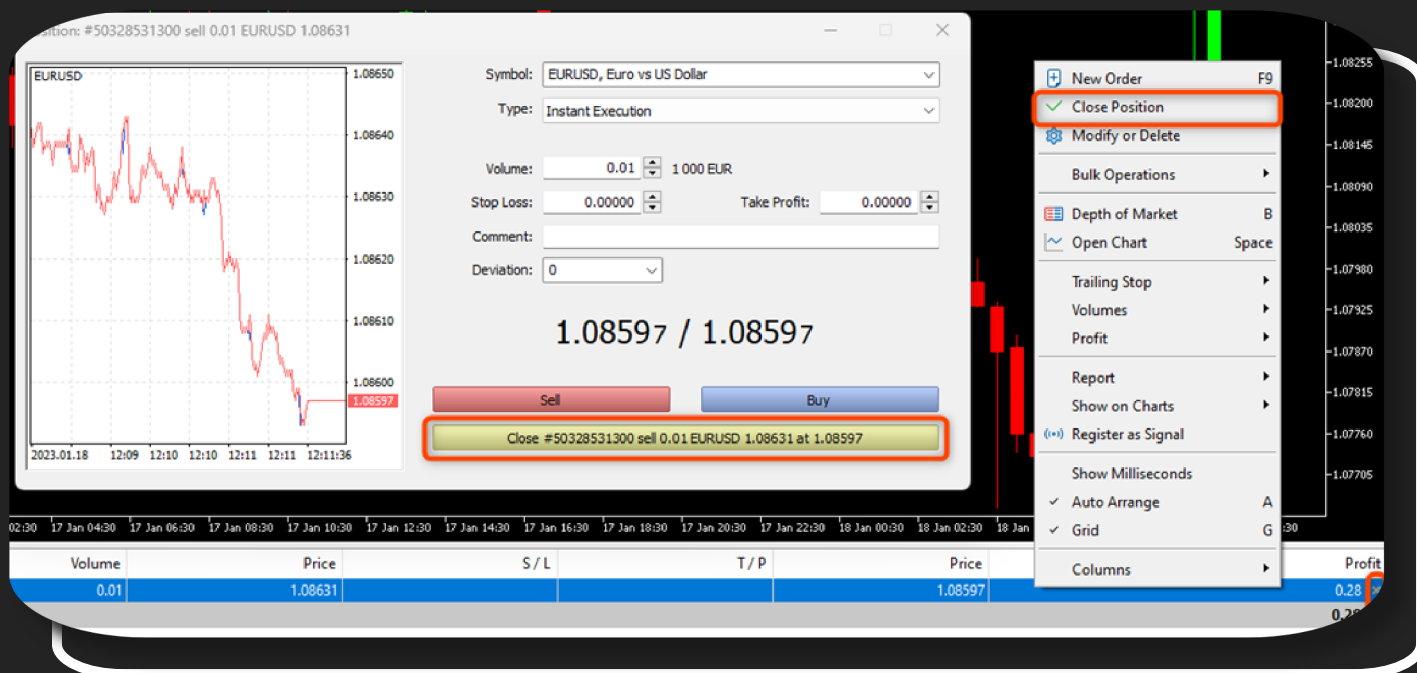

Here you can adjust the Stop Loss or Take Profit or partially close your trades.

Once you adjust your trade, you can click the "**Modify**" button to apply the changes.

Closing an open trade

In the below screenshot, we have marked the places where you can close your trade:

In the Terminal Window right-click or double-click on the open trade to see the option to "close the order".

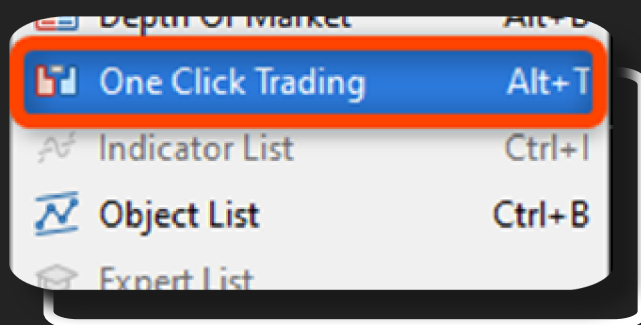

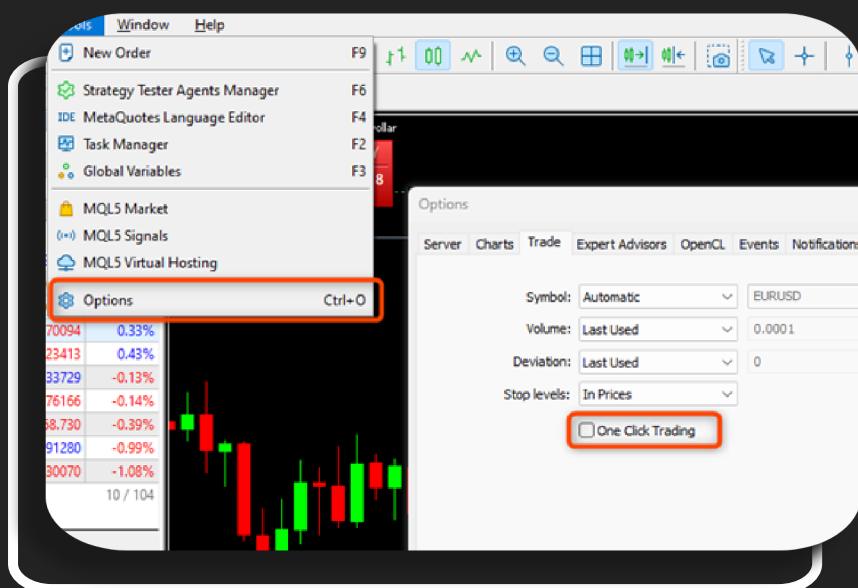

Or you can also click on the "X" button next to the price in the Profit column of your open trade.

One-Click Trading

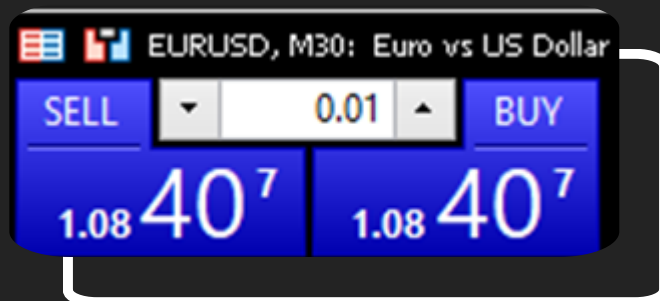

One-Click Trading is the easiest option to place trades in a quick manner directly from the chart.

To enable One-Click trading, you can click on **Tools > Options > Trade Tab > Select One-Click trading** or you can also right-click on the chart and select the **"One Click Trading"** option.

If you are enabling **One-Click trading** for the first time, you must agree to the T&C that will appear on the screen.

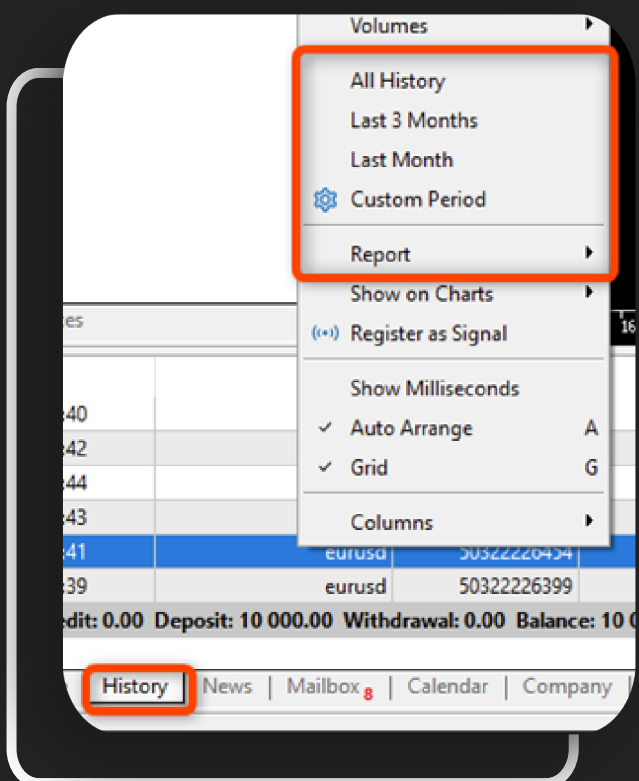

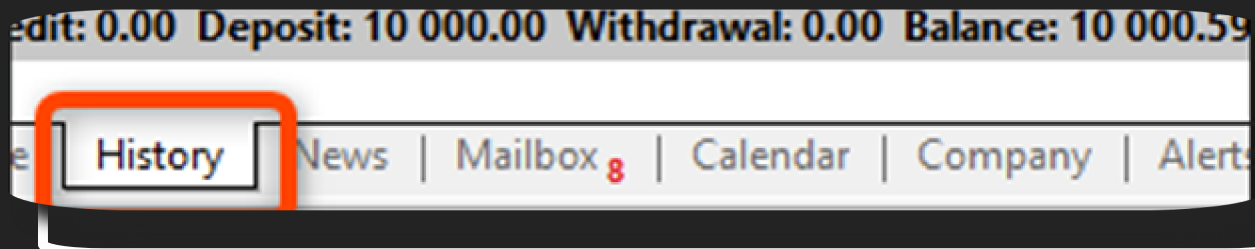

Once you have accepted the T&C, One-Click trading will be automatically displayed in the top left corner of your charts.

Disclaimer: Using One-Click trading allows you open and close trades without using the New Order window or any further confirmation.

Trading History

You can click on the "History" tab in the terminal window to see your past trading activity.

On this tab, you can right-click to adjust your trading history period or enter your own date range.

You will also be able to create and export your Trading History Statement directly from the MT5 platform

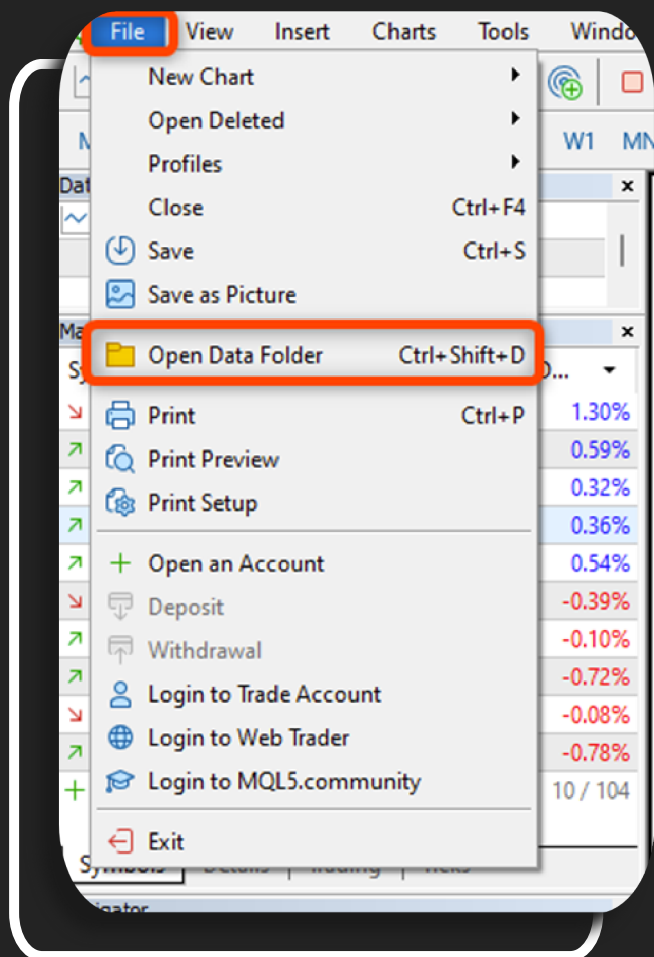

Expert Advisors

Expert Advisors or **EAs** are algorithmic trading robots that trade for you based on specific preset conditions. **EAs** can open, close, and modify trades automatically on behalf of a trader without any input required once the **EA** is enabled.

To install an **EA**, go to **File > Open Data Folder > MQL5 > Experts**.

Copy and paste all the files that you have received with your Expert Advisor. Once the files are copied, you can close and reopen your MT5 platform.

In the Navigator window, expand the "**Expert Advisors**" section and Drag and Drop the EA onto the chart.

Disclaimer: The general steps can be used for installing most EAs however you should always follow the specific steps provided by the developer of the Expert Advisor you are using.

Thank you
