# Introduction

MT4 is one of the most popular trading platforms, with good reason. A simple and easy to use interface and availability across multiple devices make it the go-to platform for both new and experienced traders.

On the OQtima MT4 Platform you can trade a wide range of instruments, including Forex, Metals, Shares, Indices, ETFs and Energies.

# MetaTrader 4

# Installation

## Desktop

The installation of the OQtima Mt4 platform couldn't be easier with these simple steps:

1

Login to your Client Portal and visit the **"Trading Platforms"** section. Under MT4, choose your device and click the "Download" button.

2

Once the installation file has finished downloading, navigate to the folder where you saved the file. This will usually be your downloads folder.

3

Double-click the installation file and follow the onscreen instructions to complete the installation.

Once installed, the platform will launch automatically, and you will be asked to log.

If you have already registered, you will simply enter the login details you already have.

If you have not yet registered, you can click [here](#) to open a Demo or a Live account.

## Web Trader

**MT4 Web Trader** is a browser-based version of the MT4 Platform and requires no installation. The Webtrader can be launched directly from your Client Portal from any computer with an internet connection.

You can use your existing login details to access both live and demo accounts on the MT4 Web Trader.

## MT4 Mobile App

The **MT4 Mobile App** allows you to trade on the go. You can monitor your account and trade from anywhere in the world, as long as you have an internet connection.

The MT4 Mobile App can be downloaded from either Google Play Store for Android devices or the App Store for iOS devices. The download links can also be found in your Client Portal, or simply click on the buttons below:

# Platform Overview

We have marked the key areas for you to familiarise yourself with

# 1

## Toolbars

You can customise and access quick shortcuts and the most useful tools.

# 2

## Market Watch

This window contains all the available instruments for trading and where you can see the BID, ASK and Spread information.

# 3

## Navigator

Here you can see all the trading accounts you logged in with and all your Expert Advisors and Indicators.

# 4

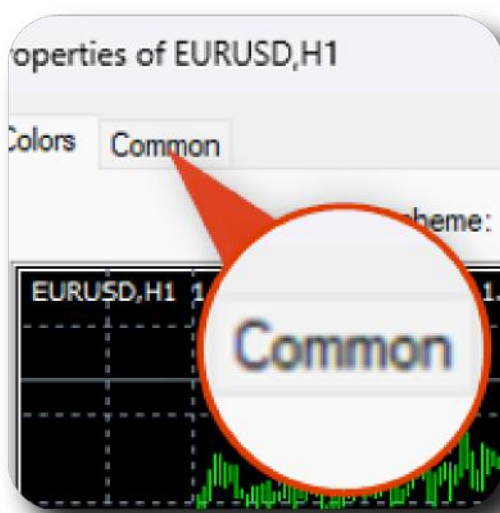

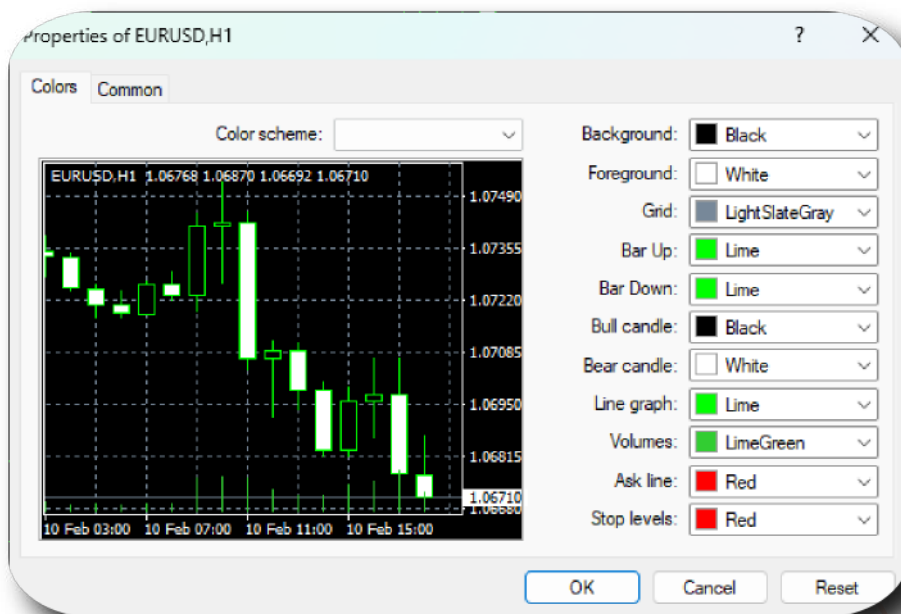

## Terminal

Where you can see and manage all your open trades and access your trading history.

## Charts and Settings

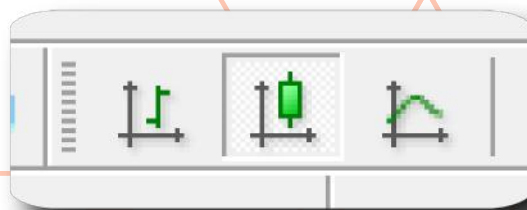

Each chart can be completely customised to suit your preferences:

If you right-click on any opened chart and click on **"Properties"**, you can select your preferred color scheme or customise each element individually.

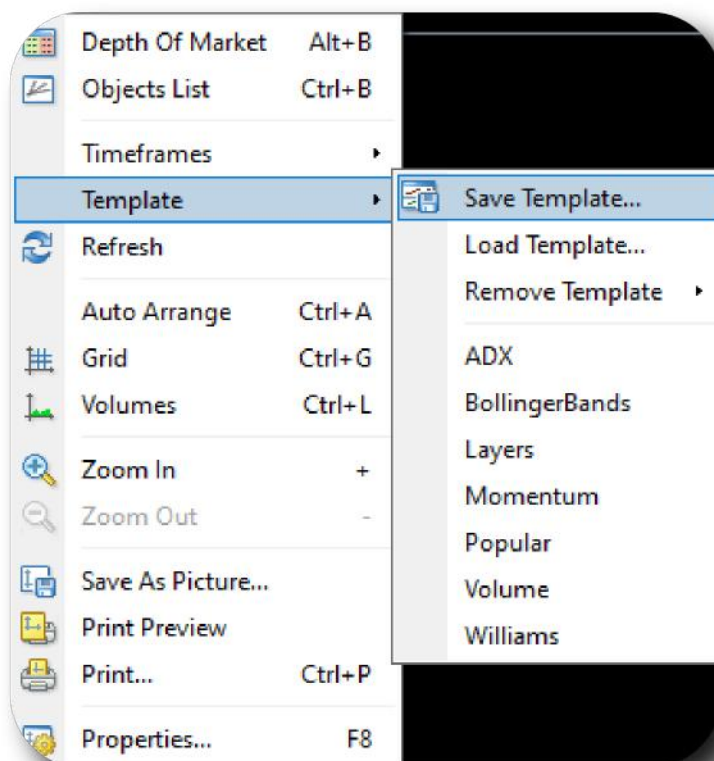

From the **"Common"** tab you can adjust additional settings, such as enabling the ASK price to be visible or changing the chart type.

Switching between different chart types can also be done from the toolbar by clicking on the respective buttons.

## Templates

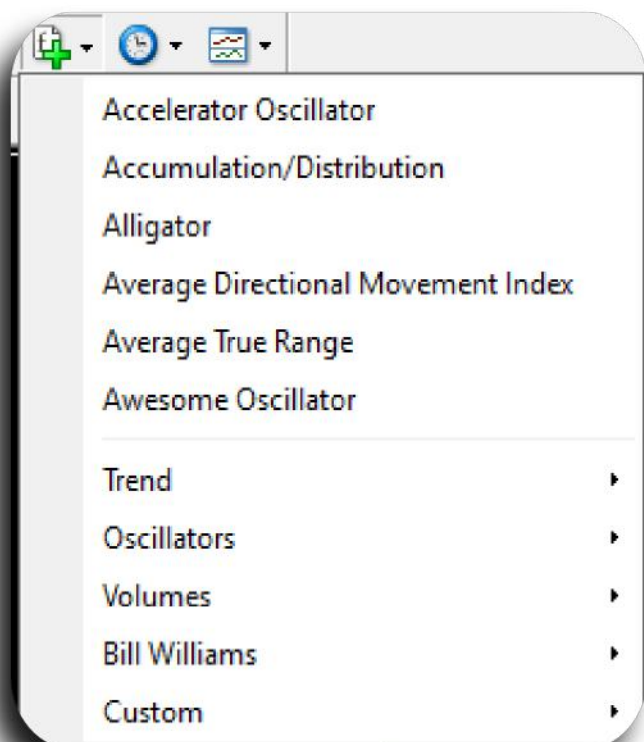

Your customised chart can be saved as a template so you can easily apply it to any chart at anytime.

To save your settings, right-click on the chart you customised and select **Template > Save Template**. Give your template a name and click on **"Save"**.

To apply the template to a new chart, right-click in the chart and then select 'Template' and then select your saved template.

## Indicators

**Technical indicators** are great tools to help with your trading strategy, and the MT4 has a wide range of preinstalled indicators to choose from.

To add an indicator simply drag and drop from the "**Indicator**" list in the Navigator window onto your chart.

A new window will pop up where you can adjust the various settings.

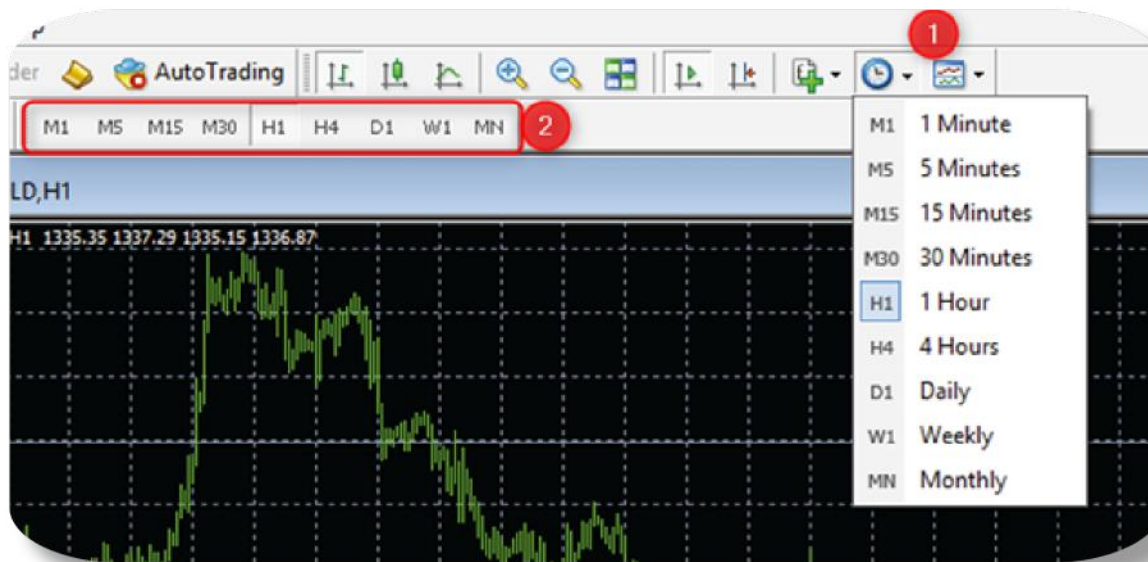

Some indicators will appear on your chart, and some will appear in a separate window just below the chart.

To delete indicators, right-click in the chart and select 'Indicators List' and then select the relevant indicator and select 'Delete'.

## Time Frames

MT4 offers 9 different **time frames** which can be applied to any chart.

You can use the **Periods** button (1) to switch between different time frames or click the appropriate time frame button directly in the toolbar (2).

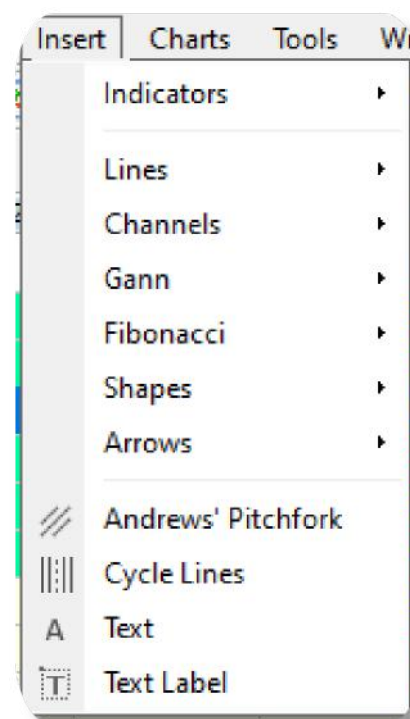

## Drawing Tools

MT4 has a wide range of **drawing tools** to assist with the analysis of the charts.

Horizontal and vertical lines can be drawn to highlight support and resistance levels, and other drawing tools such as 'Price Channels' and 'Fibonacci Retracements' can be used for more in-depth analysis.

Further drawing tools can be found from the "**Insert**" menu.

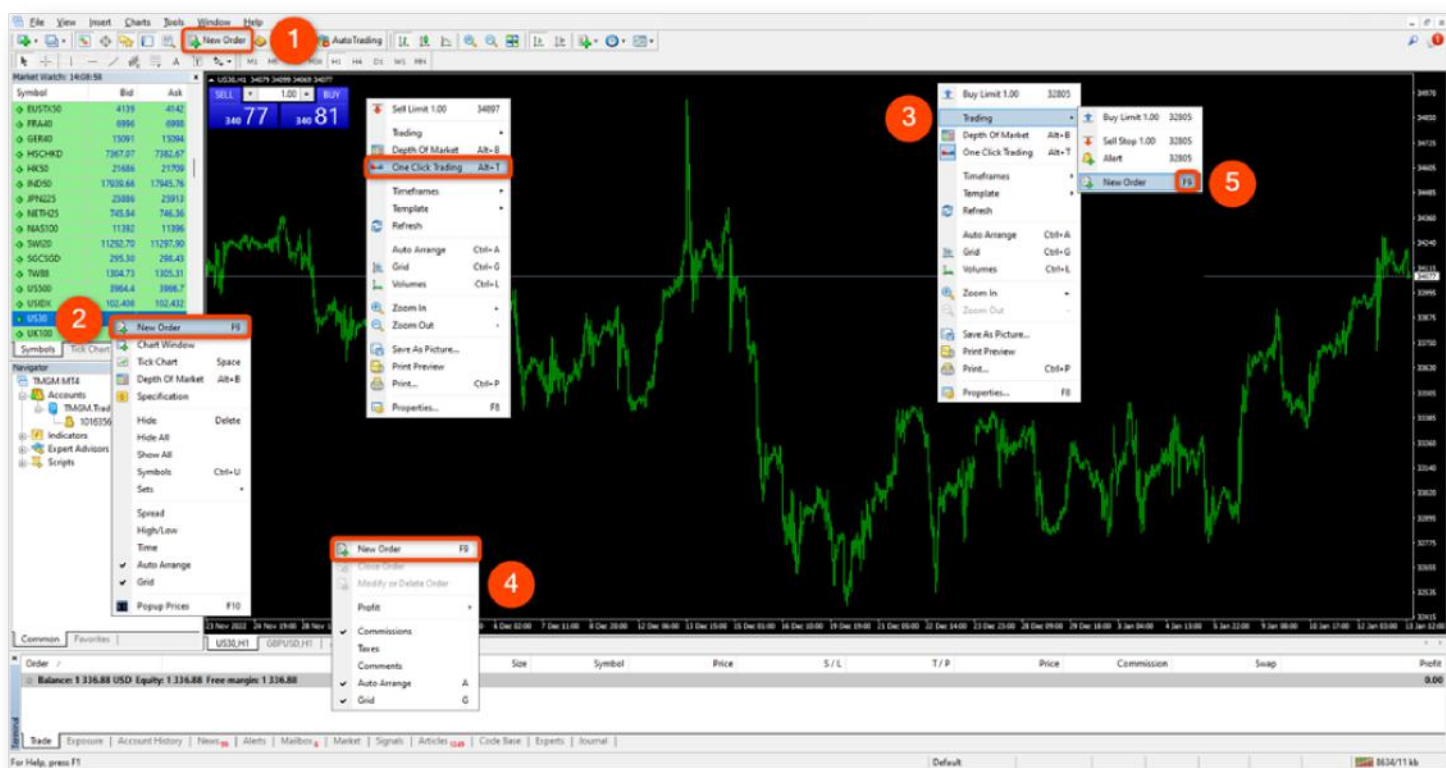

# Trading

## New Order

The easiest way to open a 'New Order Window' and place a trade, is by double-clicking on the instrument you wish to trade in the Market Watch Window.

There are several other ways too, choose the one you feel is most convenient for you:

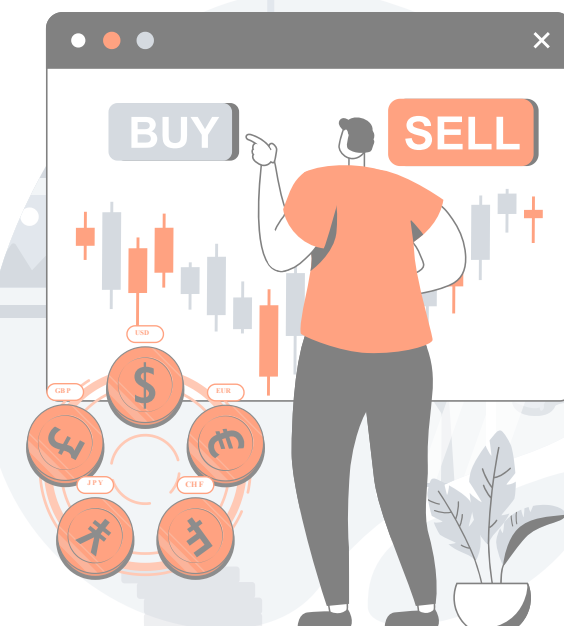

**1** **Toolbar** | Select "New order"

**2** **Market Watch** | Right-click on the instrument and select "New order"

**3** **Chart** | Right-click on the chart, select "Trading" and then "New order"

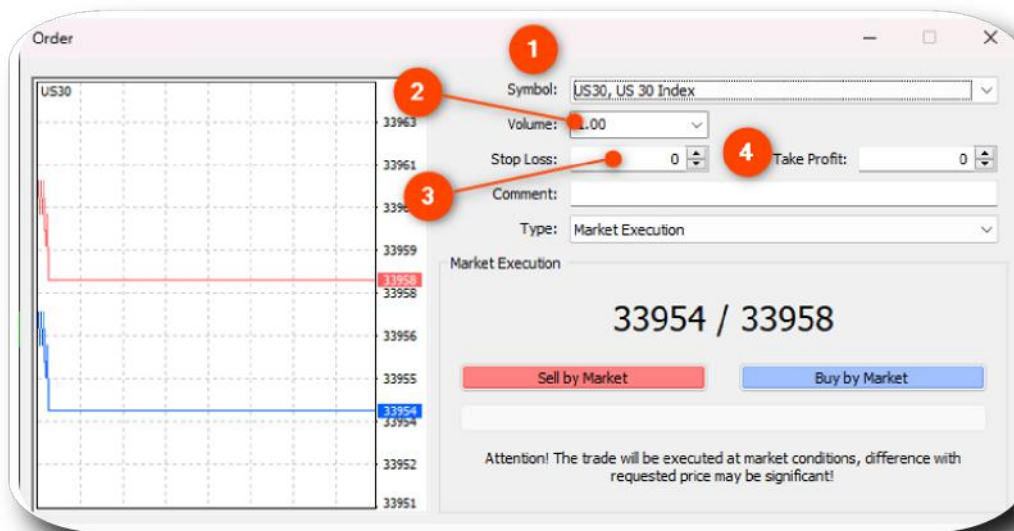

**4** **Terminal** | Right-click inside the terminal window and select "New order"

**5** **F9** | Press F9 on your keyboard

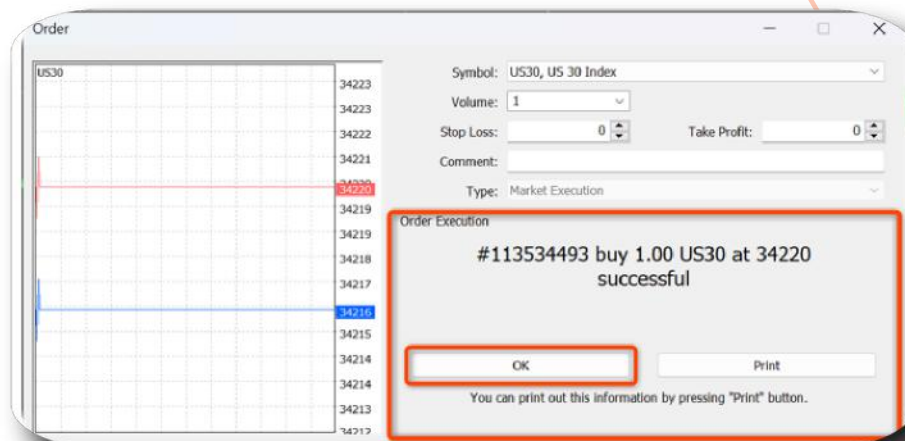

# Market Order

For each **Market order** you will see the following specification options:

- 1 **Symbol** Select the symbol you want to trade.
- 2 **Volume** Select or enter the trading volume (FX 1.00 represents 1 Standard lot which is 100,000 units).
- 3 **Stop Loss (SL)** Enter the market price you would like to set a stop loss (optional).
- 4 **Take Profit (TP)** Enter the market price you would like to set a take profit (optional).

Then click on **BUY** or **SELL**, depending on the direction you want to trade. Once executed, a confirmation window will appear. Click **"OK"** to close the new order window.

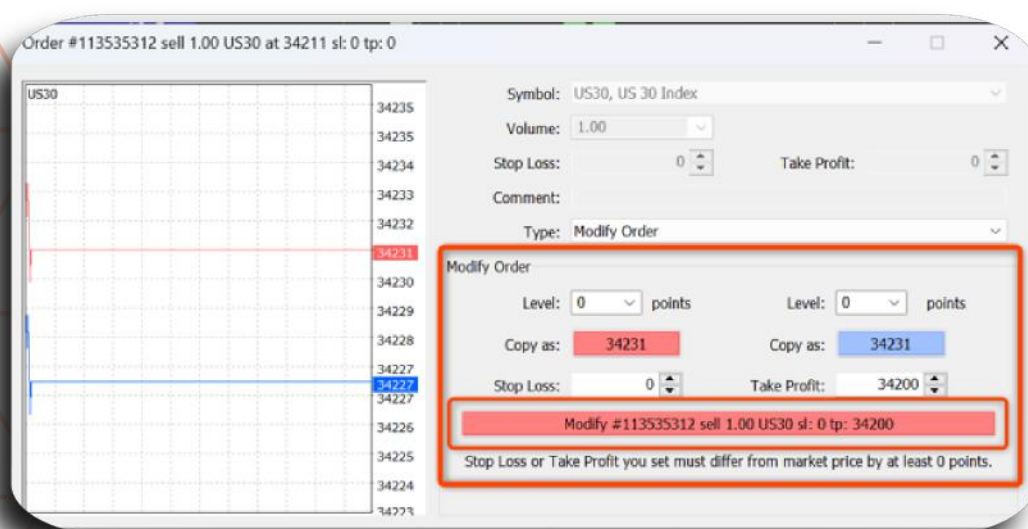

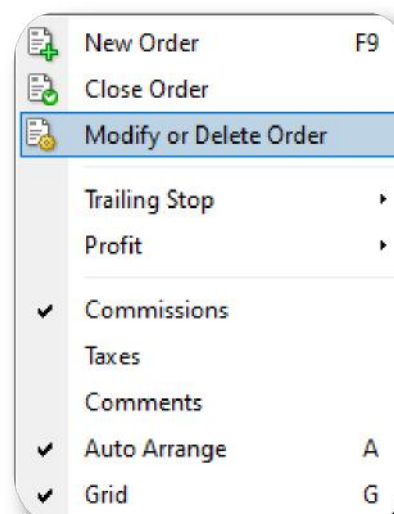

## Modifying an Open Trade

Your **open trades** can be monitored from the Terminal window by clicking on the "Trade" tab.

| Order #   | Time                | Type | Size | Symbol | Price | S / L | T / P | Price | Commission | Swap | Profit |
|-----------|---------------------|------|------|--------|-------|-------|-------|-------|------------|------|--------|
| 113535312 | 2023.01.17 12:26:08 | sell | 1.00 | us30   | 34211 | 0     | 0     | 34208 | 0.00       | 0.00 | 3.00   |

Balance: 9 986.80 USD   Equity: 9 989.80   Margin: 342.11   Free margin: 9 647.69   Margin level: 2920.05%   3.00

To **Modify** an open position, right-click on the trade in your terminal window and select "**Modify or Delete Order**", or double-click on the trade in the terminal window.

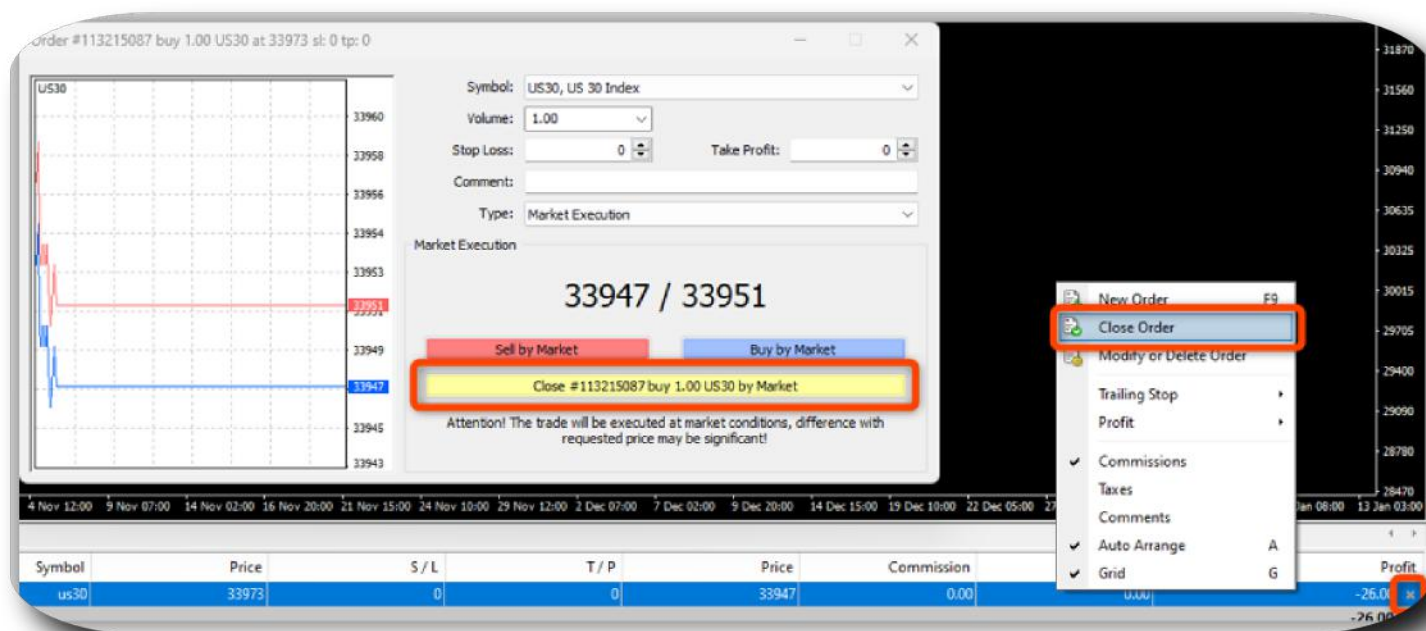

Here you can adjust the Stop Loss or Take Profit or partially close your trades.

Once you have entered your new settings, click the "**Modify**" button to apply the changes.

## Closing a trade

In the below screenshot, we have marked the places where you can **close** your trade:

In the Terminal Window right-click or double-click on the open trade to see the option to "close the order".

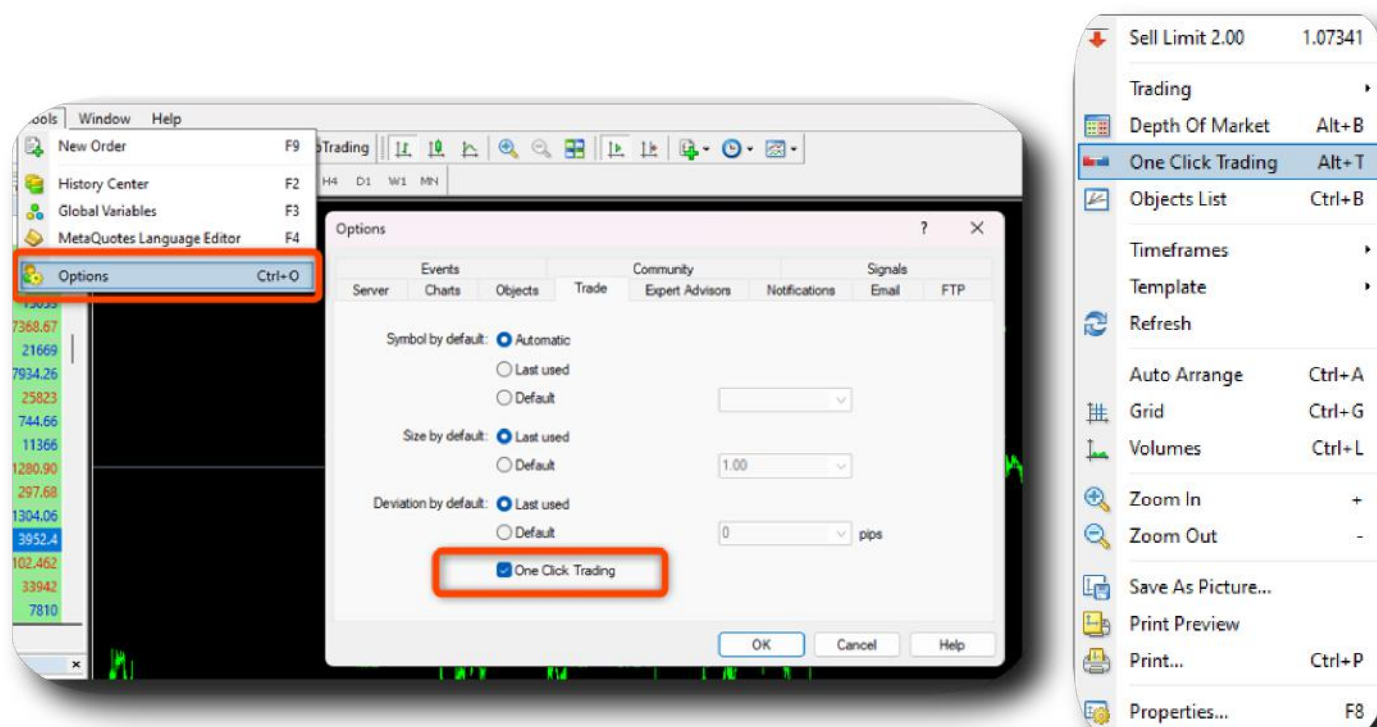

You can also click on the "X" button next to the price in the Profit column of your open trade.

## One-Click Trading

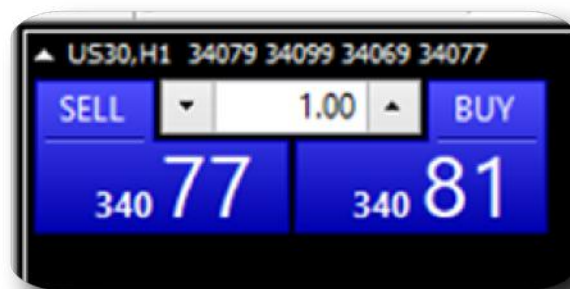

**One-Click Trading** is the easiest option to place trades in a quick manner directly from the chart.

To enable One-Click trading, you can click on **Tools > Options > Trade Tab > Select One-Click trading** or you can also right-click on the chart and select the **"One Click Trading"** option.

If you are enabling One-Click trading for the first time, you must agree to the T&Cs that will appear on the screen.

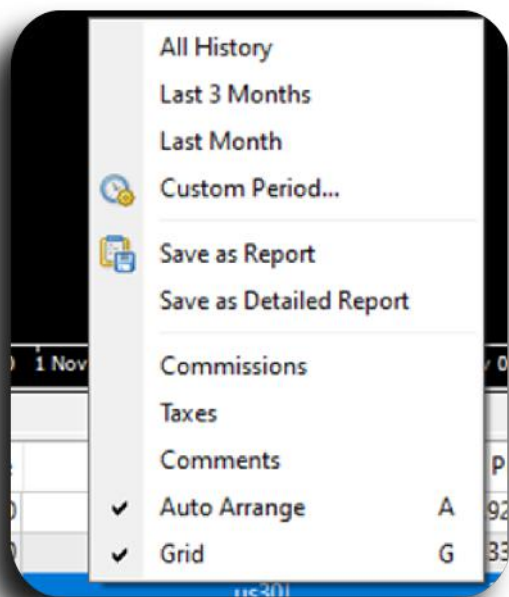

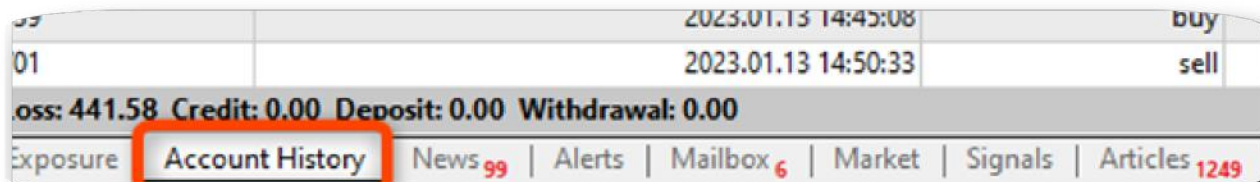

Once you have accepted the T&Cs, One-Click trading will be automatically displayed in the top left corner of your charts.

*Disclaimer: Using One-Click trading allows you open and close trades without using the New Order window or any further confirmation.*

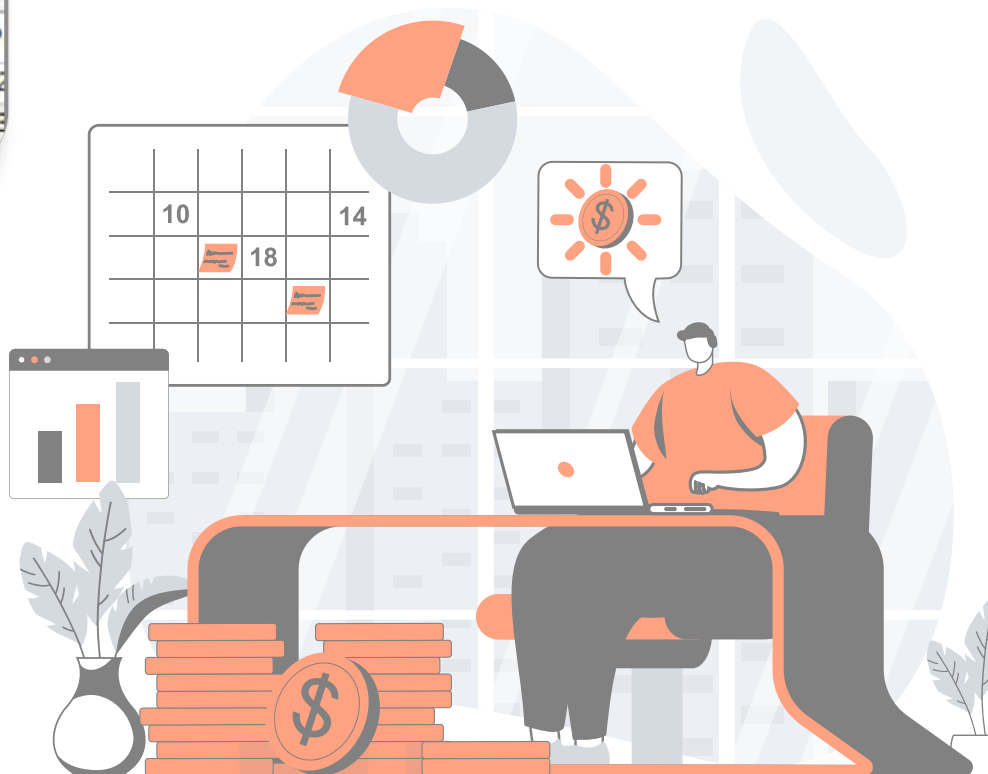

## Trading History

You can click on the "Account History" tab in the terminal window to see your past trading activity.

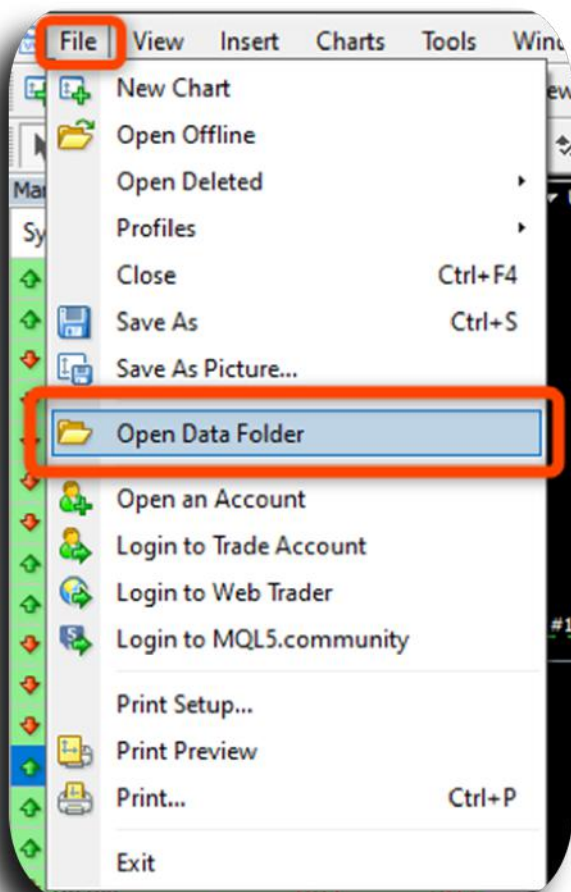

On this tab, you can right-click to adjust your trading history period or enter your own date range.

You can also export your trading history statement directly from the MT4 platform anytime.

## Expert Advisors

**Expert Advisors** or **EAs** are algorithmic trading robots that trade for you based on specific preset conditions. EAs can open, close, and modify trades automatically on behalf of a trader.

To install an EA, go to **File > Open Data Folder > MQL4 > Experts**.

Copy and paste all the files that you have received with your Expert Advisor. Once the files are copied, close and reopen your MT4 platform.

In the Navigator window, expand the **"Expert Advisors"** section and drag and drop the EA onto the chart.

*Disclaimer: The general steps can be used for installing most EAs however you should always follow the specific steps provided by the developer of the Expert Advisor you are using.*
